

Many companies struggle to keep up with the tedious tasks of gathering energy bills, extracting data, following up with suppliers, and analyzing all this information in one place. Even if that data is collected via automated processes, significant staff resources are necessary to coordinate information from your supply chain, meet deadlines, and manage the whole process.

ADEC Innovations has over 30 years' experience providing consulting services, creating software solutions, and finding business process outsourcing (BPO) and management opportunities that simplify your data collection and management. Let ADEC Innovations digitize and centralize your energy, environmental, and social data for cost savings at every step.

Harnessing Sustainability Data

Data is the key to connecting profitability and sustainability. It offers the insights necessary to implement the most effective programs and make informed business decisions. With ADEC Innovations, you will be able to identify, collect, standardize, and analyze information to ensure you are making the right decisions and achieving the best results.

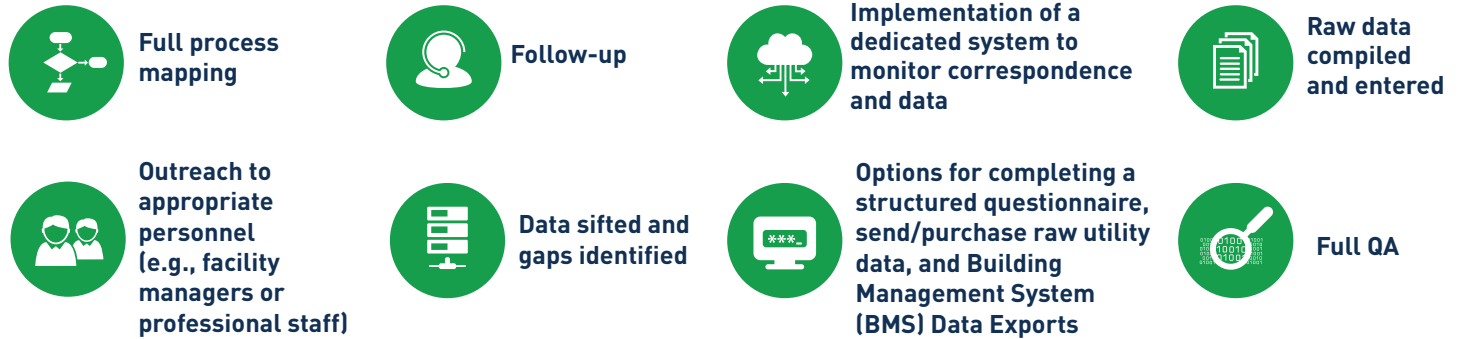

Managing your data with ADEC Innovations gives you the power to:

- Collect and standardize data
- Improve data reporting across multiple locations
- Take advantage of our high-speed document scanning and data indexing
- Optimize data entry into your system of choice
- Provide detailed metric reporting
- Facilitate large-scale collaboration
- Utilize proven software solutions specifically designed for your needs
- Gain competitive advantage as an organization fully engaged with sustainability initiatives
- Realize enhanced business performance in multi-stakeholder environments

Establishing a standard protocol, whether for waste, water, carbon, or greenhouse gas (GHG), is essential to consistent, credible, and transparent emissions reporting for your organization, and for standards like CDP. ADEC Innovations prepares a work plan that ensures full transparency and successful implementation.

The ADEC process includes:

ADEC Innovations will reach out to each facility point of contact requesting all the bills within a specified timeframe and will communicate with you about any gaps in the data. ADEC Innovations will prepare a detailed work plan to ensure full transparency and successful implementation.

Only ADEC Innovations has the unique capability to use information technology, expert people, and process to drive continuous business performance improvement. We can also combine environmental data collection with social factors such as labor relations, worker health and safety, community engagement, and supplier relations **for complete sustainability management and reporting**. Additionally, ADEC Innovations will collect the data necessary to calculate your Scope 3 emissions.

End your data chase. Seize your opportunities.

- **Lower** data collection **costs** (as much as 30%)
- **Reduced** data collection **time** (up to 50%)
- **Improved** data **quality**
- **Increased** operational **efficiencies**
- **Engaged** and collaborative **supply chain**
- **Improved** public disclosure **performance**
